

Dropbox Series Auto-Poster - Execution Summary

Execution Date: December 3, 2025 at 00:23:42 UTC

Task: Automatically process scheduled Dropbox series posts

Execution Results

✅ **Status:** SUCCESS

The scheduled task executed successfully and checked for any Dropbox series that were due to post.

Details

- **Series Processed:** 0
- **Reason:** No series with `nextScheduledAt` in the past were found
- **Script:** `/home/ubuntu/late_content_poster/nextjs_space/scripts/process_scheduled_series.ts`
- **API Endpoint:** `/api/series/process`

Log Output

```
[2025-12-03T00:23:42.181Z] 🔁 Checking for scheduled series to process...  
✅ No series ready to process at this time
```

System Information

- **Server:** Next.js Production Server
 - **URL:** `http://localhost:3000`
 - **Build Directory:** `.build`
 - **Build ID:** `sVC_inLALhWEKoJ94grUP`
-

Log File

The detailed execution log has been saved to:

```
/home/ubuntu/late_content_poster/logs/series_processing_20251203_002353.log
```

Next Steps

The system will continue to run this check hourly. When a series has a `nextScheduledAt` timestamp in the past, it will:

1. Fetch the next file from the configured Dropbox folder
 2. Generate content using the series template
 3. Post to the configured social media platforms
 4. Update the series counter and schedule the next post
-

This is an automated task execution report.
